

Thank you for your interest in Bigelow Analytical Services' bromoform analysis.

We are able to measure bromoform in many different sample types including, seaweed, animal feed, milk, rumen fluid, meat and more. Below, you will find basic information about this analysis. For more information, feel free to reach out to us at bas@bigelow.org.

Method: Solid samples are methanol extracted using the approach of Paul et al (2006) and analyzed by GC/MS, liquid samples are extracted using hexane and analyzed by GC/MS

Current Pricing for bromoform analysis:

- **\$225 setup fee** (This covers instrument setup and the running of standards)
- **\$60 fee per sample**

Timeframe: Typically, samples are analyzed, and the report delivered within 2-4 weeks of receiving the sample. (Expedited analysis can be done for an additional charge)

Shipping:

- Please send samples frozen or chilled in order to protect their integrity (if applicable).
- When shipping samples, we recommend that you send about 1 gram of material per sample to ensure we have enough to properly conduct the analyses.
- Prior to shipment, please inform us (via email bas@bigelow.org) of your intent to submit samples along with:
 1. **How many samples** you are submitting
 2. **A sample inventory list**
 3. **How many replicates** per sample you would like analyzed
 4. **How you would like the samples stored**, room temperature, -20 °C, or -80 °C

Our shipping address is:

Bigelow Analytical Services (Attn: Carmen Cartisano)
60 Bigelow Drive
East Boothbay, ME, 04544
Office: 207-315-2567 ext: 509
Cell: 845-978-1814
